

DISCLOSURE STATEMENT

Title: The Distributional Consequences of Federal Fiscal Policy, FY2000–FY2025: A Quarter-Century of Structural Shift and the 2025 Inflection Point Author: Andy Salazar Date: February 2026

1. **FUNDING** This research received no external funding from any source.
2. **CONFLICTS OF INTEREST** The author declares no conflicts of interest, financial or otherwise.
3. **INSTITUTIONAL AFFILIATION** Independent researcher.
4. **IRB / HUMAN SUBJECTS** Not applicable. All data are from publicly available administrative sources (Congressional Budget Office, U.S. Treasury, Census Bureau, Bureau of Labor Statistics, Federal Reserve). CPS ASEC microdata are de-identified public-use files distributed by the Census Bureau.
5. **DATA AVAILABILITY** All code and reproducible data are publicly available at: <https://github.com/andsalazar/FederalBudgetAnalysis>

The paper and replication package are posted at: https://papers.ssrn.com/sol3/papers.cfm?abstract_id=6285038

6. **AI TOOLS DISCLOSURE** AI tools (GitHub Copilot, powered by Anthropic Claude) were used in the following capacities during this research:
 - (a) Code development: Assisted with writing Python scripts for data collection, statistical analysis, and figure generation. All code was reviewed, tested (59 automated tests), and validated by the author.
 - (b) Statistical methodology: Consulted on implementation of structural break tests, bootstrap confidence intervals, and welfare analysis specifications. All methodological choices were validated against cited literature (Athey & Imbens, 2017; Amemiya et al., 2019; Fajgelbaum et al., 2020).
 - (c) Writing assistance: Assisted with drafting, editing, and formatting the manuscript, including LaTeX/PDF generation. All substantive claims, interpretations, and analytical judgments are the author’s own.
 - (d) Robustness and quality review: Assisted with code auditing, numerical verification, and narrative consistency checks.

All data collection, analytical decisions, parameter choices, and interpretive conclusions are solely the responsibility of the author. AI tools were not used to generate data or fabricate results.
